

## Large Range Laser Marking Machine

### Features:

- Fully safety enclosure with motorized Z axis, equipped with anti-radiation window
- Galvo head with optic parts is folding cavity design, greatly improve power stability
- Standard marking size is 600x600mm, 800\*800mm, 1200\*1200mm, 1200\*2400mm, etc
- Motorized up and down function of Z axis, adopting 3 axis dynamic focusing technology
- Adopting self-researched 3DLASER software, remote control and SDK is supported, upgradable
- High power consitence and longer lifespan, can work for more than multi-years with easy maintenance
- Adopting metal-sealed imported laser source with different laser power options, 180w, 250w, 350w, 600w
- Optional functions: CCD visual marking, auto focus, roll to roll, conveyor belt, disk rotation, OEM solutions
