

MY/SH-390 High Speed Mini "Schiffli" Embroidery Machine

Description:

SH series is the most productive model, which is specially designed and created with up to 132 speed heads, even more heads available. It is mainly applicable to high efficiency embroidery on textile and garment, such as curtain, bedding sheet, and lace on lady dress and under wear. MAYA SH presents the schiffli machine's efficiency just at the most reasonable embroidery machine's cost and space. Your investment and earnings are secured by expertise of more than 20 years from MAYA.

Features:

- Maximum running speed at 1200 SPM, practical running speed at 1100 SPM
- Latest original control system by the leading provider of full embroidery solution
- Extremely strong, steady, vibration-proof chassis for speedy, smooth embroidery
- All NEW light designed pantograph assures the smooth stitching on extreme large area
- Double powerful accurate servo motors safeguards the easy running of up to 132 heads
- Turbo powerful accurate customized servo motor system drives pantograph in X/Y shaft
- Unique designed speedy (MAYA DS) heads mounting from the front for easy maintenance
- Extra wide linear guide rail with jumbo bearings for precise and durable motion of pantograph
- Separately mounted tension base on upper beam assures the most smooth feeding of thread
- Separately mounted tension base on upper beam assures the easy and accurate color change
- Extra wide thread stand for giant thread bobbin reduces down time of changing upper thread
- Soundless designed presser foot driving system improves the user's experience
- Easy to adjust the height of presser foot according to different thickness of fabric
- Smooth feeding of embroidery thread on the unique tension base, even metallic thread
- Genuine parts and automatic oiling system safeguards the long lasting 24 hours running

Configurations:

- The latest original 10 inch OP Box, faster and safer control system than ever
- Smaller and lighter, but faster and safer main control system than ever
- Easy to manage embroidery machines and designs by network connection
- Multiple popular languages are available, say NO to language obstacles
- Massive storage memory up to 100 million stitches, and 800 designs, ever more;
- Security by wide range of 185V - 265V AC voltage input and automatic shutting down
- Multi-task operation, edit designs, modify parameters on the running machine
- Genuine imported Japan-made rotary hook, bobbin cases, bearings and screws
- Genuine imported Italy-made or German-made timing belts for X/Y motion
- High precision 1000 resolution embroidery-purpose-customized encoder
- Made of all patented original components of high precision and durability
- Made by all MAYA expertise of more than 20 years in embroidery machines

Parts:

Automation

Japan Bearings

Japan Gears

Japan Encoder

Japan Rotary Hook

Japan Bobbin Case

Precise Servo Motor

Germany Belt
